Planting Notes

1. The planting plan shall illustrate the location and massing of all plants, with respect to any existing structures, streets, or areas to be preserved.
2. The planting plan shall provide a detailed list of all plant species, including common and scientific names, and their location within the site.
3. The planting plan shall indicate the size and variety of all plant species, including their average mature height and spread.
4. The planting plan shall illustrate the method of planting, including the depth of planting and the use of any mulch or soil amendments.
5. The planting plan shall indicate the irrigation requirements for each plant species, including the type and amount of water needed.
6. The planting plan shall indicate the maintenance requirements for each plant species, including the frequency of pruning, fertilization, and pest control.
7. The planting plan shall indicate the safety considerations for each plant species, including any potential hazards to pedestrians or vehicles.
8. The planting plan shall indicate the aesthetic considerations for each plant species, including the color, texture, and form of each plant.
9. The planting plan shall indicate the environmental considerations for each plant species, including their potential impact on the local ecosystem.
10. The planting plan shall indicate the economic considerations for each plant species, including their projected cost of maintenance and replacement.

Requirements Met

1. The planting plan shall be approved by the project management and the client.
2. The planting plan shall be submitted to the city for review and approval.
3. The planting plan shall be revised as necessary to address any comments or concerns from the city or the client.
4. The planting plan shall be updated as necessary to reflect any changes in the site conditions or the client's specifications.
